# Northeast Chargers: "High-quality engineering ensures superior performance and reliability"

**Northeast Industrial Batteries, Inc.** is a third generation, family-owned business that was established in 1968 with years of experience in manufacturing and supplying high quality industrial chargers and batteries.

Northeast is especially well-known for producing some of the most reliable and cost-effective battery chargers available in the United States.

## What makes our chargers so popular?

- Fully-welded structural steel frames for maximum durability.
- Sophisticated, environmentally friendly powder-coating process to give them a tough, attractive, high-gloss finish.
- Modular design that permits easy and inexpensive servicing.
- AC and DC fuses are equipped with sight glasses that allow easy diagnostics.

*Last but not least, we are concerned about your safety.* That is why all Northeast chargers come with fully automatic start/stop controls, easy-to-read digital amperage indicators, performance diagnostics with DV/DT termination, and they are all UL®/CUL® approved.

## Summary of Features:

- UL® and CUL® approved
- Fully-welded structural steel frames for maximum durability
- Frames and cabinets covered with an electrostatically applied powder coating
- Pre-punched frame for stackability
- Modular component design for easy maintenance
- 100% rated transformers with all copper windings and Class H insulation
- Easy, quick AC power conversion taps
- 24 volt control circuit
- Fully automatic start/stop control with performance diagnostics and DV/DT termination
- DC driven Auto Control
- Thermally protected, multivoltage control transformer
- AC power input fuse block with indicator fuses
- High-current, brass shunt and DC output assembly
- Low-maintenance safety release DC output cables
